

Carbon

Use at 20-1 solution, **Speed Clean** can solve these problems:

- 1 For stacks, spray directly on and rinse off surface when carbon appears to run
- 2 When using for dipping (in extreme cases) mix a 7-1 solution, soak for one hour and rinse (e.g. carbon on piston heads, spoxy glues, silicone, seals and gaskets).

Jewellery

Speed Clean can be used in any ultra-sonic machine at a dilution of 80-1. For the home, **Speed Clean** can be used simply by using a cup of solution (40-1) and a slow circular motion which will add lustre and shine to the pieces. Rinse and pat dry with a clean cloth.

Laundry

Speed Clean can be used as a pre-spray on clothing (avoid satin, silk and soft leather), removing virtually every stain. The results are astonishing. Whether it be tar, grease, oil, blood, inks, make-up or grass. **Speed Clean** will reduce expenses drastically in your laundry room. solution 30-1.

As you can see, **Speed Clean** can be used on any surface. However, a few rules should be followed:

- 1 Always mix **Speed Clean** with water. Sea water also may be used. The product should not be used stronger than 7-1 solution
- 2 Always test for colour-fastness when using **Speed Clean** on fabrics. Keeping this in mind, you will find **Speed Clean** economical, quick and easy to use, and maybe even fun!
- 3 Write to us for more information on its use in undertaking special projects
- 4 **Speed Clean** is not available through stores. Contact your company representative.

Gas Stations

Speed Clean is excellent for the removal of diesel stains from in and around the pumps as well as being very effective in removing grease and stains from the pump handles and paintwork.

Speed Clean is also great for general cleaning inside on floors, plastics, counters, painted surfaces and even glass which it helps to keep the fridge doors from condensating.

Initially mixed at a 10-1 ratio for the removal of tough stains this can then be diluted down to a 20-1 to maintain these surfaces for everyday use.

Body Shops

Speed Clean will remove urethane off glass, hands upholstery and carpets without smearing. Allied Chemicals recommends a pre-spray concentrate at the beginning of this particular task. Below we have other applications:

- 1 Overspray – off brake lights, tyres, glass, interiors
- 2 Silicone on door jams, tyres, interiors
- 3 Metal prep primer wash; anti-static, prevents fisheyes, swirls and bubbles
- 4 Removes baked-on tape
- 5 Fibreglass is cleaned up by a 20-1 solution
- 6 Paint oxidation: work in sections, 10-1 solution will restore paint in half the time

Aluminium, Stainless Steel, Magnesium, Chrome

Speed Clean will attack these problems with a 20-1 solution. Takes out salt pits, rust, water stains (ovens) and can inhibit rust from occurring when used regularly. No white streaks on aluminium.

Methamphetamine Decontamination

Speed Clean used at full strength, has been proven through laboratory testing. It significantly reduces contamination from Methamphetamine, and the chemicals used in manufacture including but not limited to; Ephedrine, Amphetamine and Pseudoephedrine. The test sample was found to reduce levels by 97%

Carpet

Speed Clean can be used to shampoo with carpet machine with incredible results.

Just follow these steps:

- 1 Vacuum before shampooing
- 2 Use a 50-1 mixture with water (10-1 for heavy spotting)
- 3 Add solution to holding tank
- 4 Shampoo entire carpet
- 5 Remove excess moisture from carpet with towels or vacuum if necessary.

Speed Clean can be used without a machine and will remove wine, grease, blood – virtually everything except dyes. Suggested dilution: 30-1

Machine Shops

Speed Clean will replace varsal, carb-cleaner, WD-40 and handle your dipping tanks at 7-1 or 10-1.
